Estimating Your Cost to Attend Widener University for the 2022-2023 Academic Year

This is an information sheet for undergraduate tuition and housing expenses to estimate your costs for attending Widener University. The annual total cost listed below for fall and spring does not include books, health insurance (if required), course fees, and miscellaneous costs such as transportation, personal or recreational expenses.

Please determine your estimated cost based on the housing status indicated on your offer letter. Award offers are subject to adjustment if you change your decision to either commute or live on campus in University housing. For example, if your offer is based on you living in a residence hall (ON CAMPUS), your financial aid awards will change if you choose to be a commuter.

DO NOT INCLUDE Federal Work Study in your cost estimate: Federal Work Study awards are NOT credited to the student's semester account. These funds are paid directly to the student in the form of a bi-weekly paycheck based on the number of hours worked for part-time employment on campus.

You will be billed for each semester at Widener University. Your semester bill is expected to be paid prior to the start of each semester. For information on billing and all Widener tuition and fees charges, please visit <http://Widener.edu/BursarOffice> and look for the "Undergraduate Tuition Rate and Payment Guide."
